

Dear colleagues,

The most fashionable and demand learning technology in K-12 – case-lessons and case-courses for students. They perfectly replace many boring ordinary lessons.

The best in the world Education Systems implement them widely. So, we created more than 100 modern case-lessons that became very popular in many countries.

You can see them on the special Knowledge Hypermarket «EduFuture 7W» (5 million unique visitors monthly, worldwide).

They are packed in super modern online format, and students enjoy wonderful results, because they accept knowledge deeper, faster and memorize it for longer.

It is also favorable for teachers and principals, because they use innovative technologies of the world level. Parents are happy that their kids acquire good fundamental knowledge within personal skills: team building, choosing priorities, creativity, decision-making, critical thinking, etc.

Teachers also have three significant advantages: they save time to prepare for the lessons; they have no discipline problems with the students; and they get attractive opportunity to earn additional personal income.

Our Case Project was the finalist in the Contest for creating the best education system in the USA (organized by Laurene Jobs, Apple, 2016). Also, we took part in the International Contest in Hong Kong (organized by Charles Yidan, Tencent, 2017), and got the special recognition of our advanced learning materials – case-courses 7W.

We want you, your school and students to become prosperous and wealthy, using case-lessons 7W – the most powerful Education Wonder of the 21-st century. More details, references and results can be seen here.

Thank you for your attention and time. And try case-lessons today.

Vladimir Spivakovsky, Ph.D

President of Edu Future
